E-Waste Assignment

Q1] Compare the E-waste data of India with 5 other nations and reflect :-

Q2] Give 5 methods which can be implemented in India.

Q1]

India v/s China

China generates much more ewaste, but India has the highest growth rate. China also recycle much more formally.

India v/s USA

The USA generates more ewaste than India and has a much better formal recycling system.

India v/s Germany.

Germany generates less ewaste but recycles over half of it, unlike India.

India v/s Japan

Japan produces less ewaste and has a far more efficient recycling system than India.

India v/s Brazil

India generates more E-waste and has a faster growth rate, while both countries face

eve recycling challenges.

Reflection.

- India is one of the fastest-growing e-waste generators.
- Its formal recycling rate is very low compared to developed countries.
- India needs stronger recycling infrastructure, stricter policy implementation and greater public awareness for sustainable e-waste management.

Q2] 1) Strengthen Formal Collection and Recycling Systems.

→ Establish more authorized e-waste collection centers and improve formal recycling facilities to reduce dependence on the informal sector.

2) Enforce strict e-waste laws - Japan

→ Improve Implementation of e-waste regulations.

3) Promote reuse and repair - European Union (EU)

→ Encourage repairing and reusing electronics.

4) Increase public awareness - United Kingdom.

→ Educate people on proper e-waste disposal.

5) Producer take-back programs - Australia.

→ Manufacturers should collect old electronic Products.
